L'azienda

La nostra azienda nasce nel 1994, dalle perspicaci intuizioni di due giovani imprenditori pratesi che hanno riconosciuto nei primi scampoli di tessuto non tessuto proveniente dagli Stati Uniti le grandi potenzialità di quelli che sono divenuti col tempo prodotti utilizzati ormai da ognuno di noi nella vita quotidiana.

Inizialmente specializzati in articoli per la pulizia, siamo riusciti, con impegno costante e grande dedizione, ad ampliare le applicazioni del tessuto non tessuto, passando per il settore della bellezza e cura dei capelli, fino al comparto ho.re.ca. e al settore sanitario. Oggi contiamo oltre 130 dipendenti, 8 unità produttive su circa 50.000 mq di superficie coperta e una rete vendita capillare su tutto il territorio nazionale, composta dai migliori grossisti del settore professionale.

L'incessante ricerca di innovazione, sia per quanto riguarda processi produttivi di ultima generazione, sia relativamente alla scelta di materie prime di eccellente qualità, accompagnata dal gusto del bello e dalla cura dei dettagli, contraddistingue da sempre la nostra mission aziendale. Costantemente attenti alla soddisfazione del cliente, puntiamo a instaurare relazioni solide sia con i nostri partner che con i collaboratori e colleghi, per raggiungere assieme gli obiettivi con passione e fiducia reciproca.

Negli anni la nostra azienda è diventata la realtà di riferimento a livello nazionale nello scenario dei prodotti

monouso in tessuto non tessuto, riuscendo a posizionarsi tra le prime in Europa e nel mondo, con esportazioni verso più di 70 Paesi.

Negli ultimi anni più che mai siamo particolarmente attenti al tema della sostenibilità ambientale, sia in termini di utilizzo di fonti energetiche rinnovabili per l'alimentazione del comparto produttivo, sia per quanto riguarda l'uso di materie prime a bassissimo impatto ambientale, che rispettino i criteri di gestione responsabile delle foreste e compostabilità. A questo proposito, il nostro Dipartimento di Ricerca e Sviluppo si adopera continuamente per sviluppare prodotti usa e getta ecologicamente intelligenti, che offrano la massima funzionalità, senza però impattare negativamente sull'ambiente. Negli ultimi anni abbiamo inoltre conseguito le certificazioni OK Compost Industrial, FSC e PEFC.

Di recente abbiamo intrapreso un ambizioso percorso di trasformazione digitale che ci porterà ad un completo controllo della gestione, per il conseguimento di ancora più elevati standard qualitativi.

Questa forte vocazione digitale ci ha spinto ad espandere e consolidare il progetto Industria 4.0 fino alla creazione di uno strumento completamente innovativo e personalizzato che supporterà le nostre azioni di marketing e di vendita, attraverso l'utilizzo della tecnologia AR (Realtà Aumentata).

RO.IAL

Our company

Our company was founded in 1994 in Prato, from the clever intuitions of two young entrepreneurs who recognized in the first remnants of non-woven fabric from the United States the great potential of those that, over the time, have become products used by everybody in our daily lives.

Initially specialized in cleaning items, we have succeeded, with constant commitment and great dedication, in expanding the applications of the nonwovens, passing through the beauty and hair care sectors, up to the ho.re.ca. and sanitary fields. Today we have over 130 employees, 8 production sites on approximately 50,000 square meters of covered area and a widespread sales network throughout the country, made up of the best wholesalers in the professional sector.

The incessant search for innovation, both regarding the latest generation of production processes and the choice of excellent quality raw materials, accompanied by the taste for beauty and great attention to the details, has always distinguished our corporate mission. Constantly attentive to customer satisfaction, we aim to establish solid relationships with both our partners, associates and colleagues, to achieve goals together with passion and mutual trust.

Over the years, our company has become the point of reference at a national level in the scenario of disposable

non-woven products, managing to position itself among the first in Europe and in the world, with exportations to more than 70 countries.

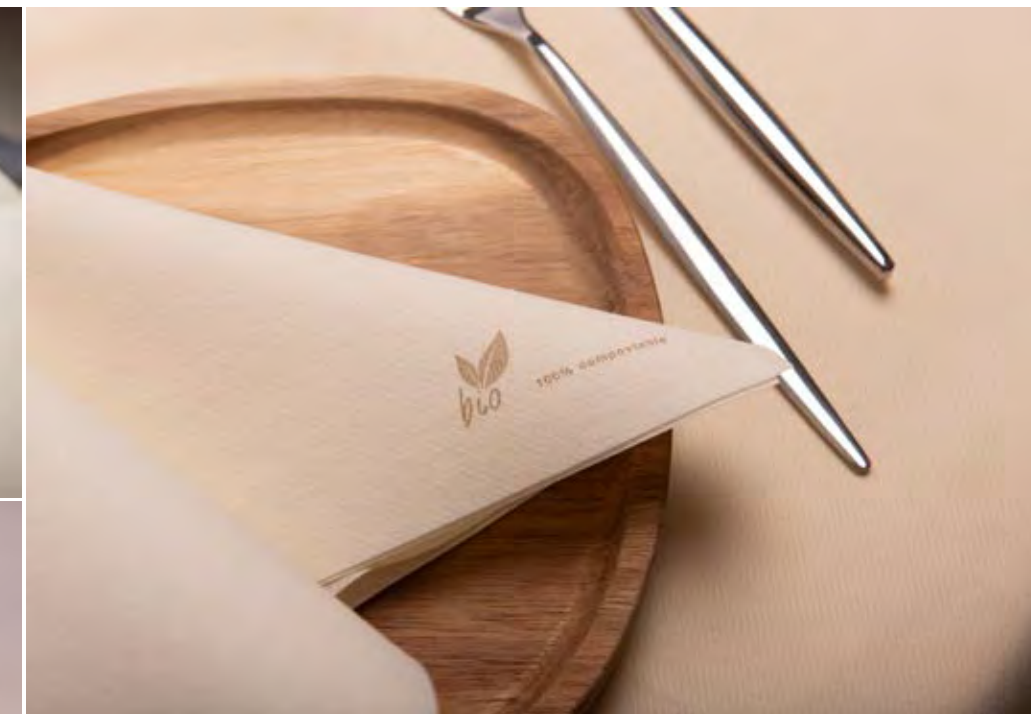

In recent years, more than ever, we are particularly attentive to the issue of environmental sustainability, both in terms of the use of renewable energy sources to power our production plants, and in terms of the use of raw materials with very low environmental impact, which respect the responsible forest management and compostability criteria. About this matter, our Research and Development Department continuously strives to develop ecologically intelligent disposable products, which offer the best performances, without negatively impacting the environment. In recent years we have also achieved OK Compost Industrial, FSC and PEFC certifications.

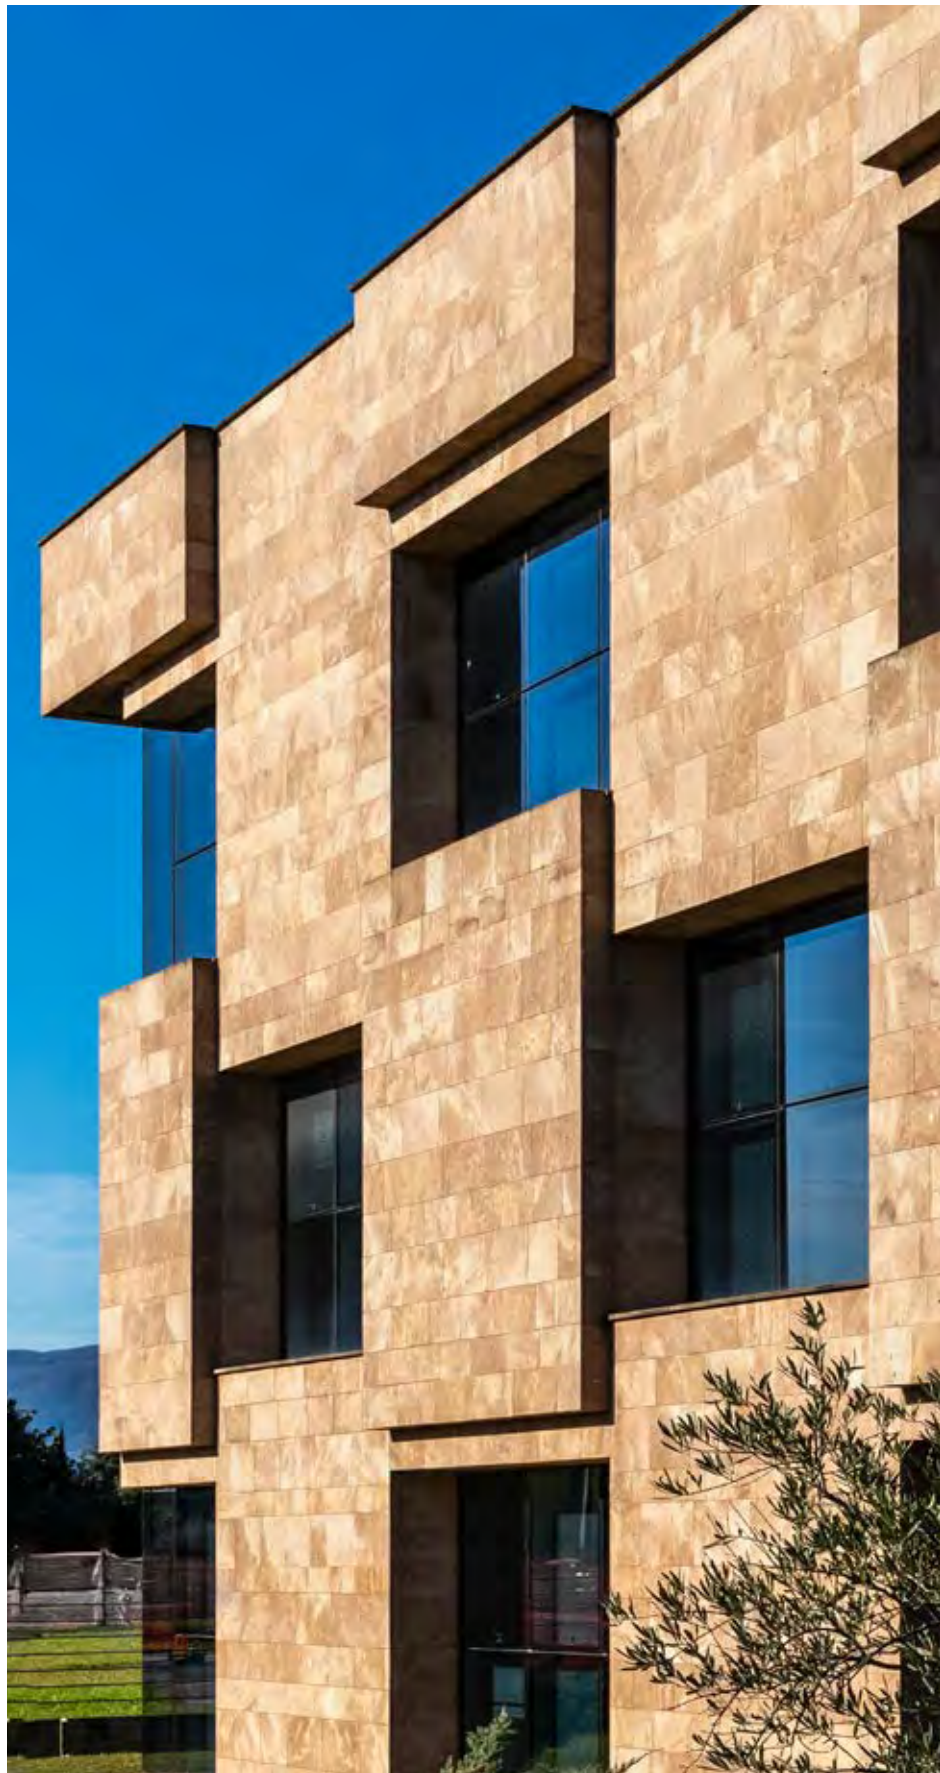

We have lately taken an ambitious digital transformation journey that will lead us to complete management control, in order to achieve even higher quality standards.

This strong digital vocation has driven us to expand and consolidate the Industry 4.0 project up to the creation of a completely innovative and personalized tool that will support our marketing and sales actions, through the use of AR (Augmented Reality) technology.

IT

Materiale di derivazione naturale in cui le fibre di cellulosa sono fissate tenacemente da leganti vinilici e la cui resistenza alla trazione è superiore alla cellulosa tradizionale. Il materiale si presenta alla vista liscio o gofrato, è morbido al tatto ed estremamente assorbente. Generalmente nasce bianco e può essere stampato con un'ottima tenuta dei colori, dovuta al forte coefficiente di assorbenza del materiale stesso; può anche nascere già colorato in polpa. Lo smaltimento corretto è nella raccolta differenziata carta (si consiglia verifica con le Amministrazioni Locali).

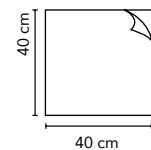

EN

Material made of natural cellulose fibres, that are bonded together with vinyl binders, with tensile strength much higher than traditional cellulose. It can be plain or embossed, very soft and extremely absorbent. Airlaid is usually white at the origin, and, because of its high level of absorbency, it can be printed producing beautiful and colour fastness results. The material can also be pulp-coloured.

AIRLAID DECORATO PRINTED AIRLAID

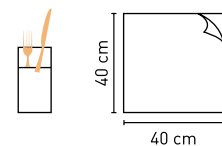

IT

Materiale di derivazione naturale in cui le fibre di cellulosa sono fissate tenacemente tramite forti getti d'aria e la cui resistenza alla trazione è superiore alla cellulosa tradizionale. Il materiale si presenta alla vista liscio o goffrato, è morbido al tatto ed estremamente assorbente. Generalmente nasce bianco e può essere stampato con un'ottima tenuta dei colori, dovuta al forte coefficiente di assorbimento del materiale stesso; può anche nascere già colorato in polpa. Lo smaltimento corretto è nella raccolta differenziata carta (si consiglia verifica con le Amministrazioni Locali).

EN

Material made of natural cellulose fibres, that are bonded together by strong air jets, with tensile strength much higher than traditional cellulose. It can be plain or embossed, very soft and extremely absorbent. Airlaid is usually white at the origin, and, because of its high level of absorbency, it can be printed producing beautiful and colour fastness results. The material can also be pulp-coloured.

TESSUTO NON TESSUTO NON-WOVEN

IT

Materiale di derivazione mista, naturale e/o sintetica, le cui fibre sono fissate tra loro tramite intreccio, il che rende il tessuto estremamente resistente alla trazione e soffice. Si presenta generalmente liscio, è morbidissimo e drappeggia esattamente come una vera stoffa. Nasce bianco e può essere stampato con un fissaggio dei colori ad "effetto tessile". Lo smaltimento corretto è nella frazione secca della differenziata (si consiglia verifica con le Amministrazioni Locali).

Tutti i decori stampati su tessuto non tessuto spunlace possono essere prodotti in versione Bio-compost, su richiesta, per un minimo di produzione che dipende dal decoro scelto.

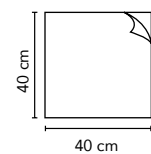

EN

Material that is a blend of natural and/or synthetic components. Its fibres are interlaced and gives it an extremely high tensile strength. It is very soft and looks, feels and drapes like real cloth. Spunlace is white at the origin and can be printed, with nice colour fastness and results very similar to printed fabrics. All the designs printed on non-woven tissue spunlace can be produced in Bio-compost version, on request, for a minimum order quantity that depends on the design chosen.

TESSUTO NON TESSUTO POLIPROPILENE NON-WOVEN POLYPROPYLENE

IT

Materiale 100% sintetico che nasce dalla lavorazione di un polimero plastico, il polipropilene, tramite una tecnica di produzione chiamata "spun bonded". Tale lavorazione rende le fibre resistentissime alla trazione. Si presenta sempre gofrato, nasce bianco o colorato in origine, ed ha una gamma colori sconfinata. Lo smaltimento corretto in caso di prodotto pulito può avvenire nella frazione dedicata alla plastica.

EN

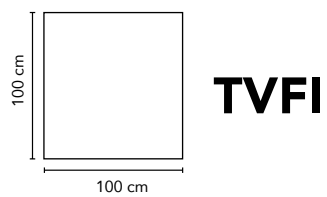

Material that is 100% synthetic and comes from a plastic polymer (polypropylene) that undergoes a production technology called "spun bonded". This process gives the fibres an extremely high tensile strength. The material is embossed and is produced white or in an unlimited range of colours.

PRODUZIONI PERSONALIZZATE

È possibile produrre tovaglie e tovaglioli a marchio del cliente, su quantitativo minimo, variabile a seconda del formato, del materiale e del numero dei colori di stampa richiesti. È necessario l’invio per email del logo del cliente (preferibilmente in formato pdf o altro formato vettoriale), in modo da valutarne la fattibilità e poter poi elaborare bozza grafica. I costi degli impianti stampa e/o dei lavori grafici non hanno una tariffa fissa, ma vengono addebitati al costo. Per poter procedere con la produzione è necessario aver ricevuto conferma scritta dell’offerta e della bozza grafica.

Per le stampe su fondo colorato il risultato finale è influenzato dal colore di base e non potrà essere totalmente fedele alla proposta effettuata; per tale motivo, con basi colorate si consiglia di scegliere stampe tono su tono. Su fondo bianco, invece, il risultato ottenibile sarà sicuramente più fedele ai colori mostrati sulla bozza; tuttavia, la grande capacità di assorbenza del materiale e il fatto che gli inchiostri utilizzati siano a base acquosa, fanno sì che i colori tendano comunque a risultare meno brillanti rispetto a quelli stampati su bozzetto di carta.

CUSTOMIZED PRODUCTIONS

We can produce tablecloths and napkins with customers’ logo; the minimum order quantity varies on the basis of the size, material and number of colours chosen. It is necessary to send the customer’s logo by email (possibly in pdf or other vector format), so that we can consider its feasibility and develop a graphic draft. Costs of printing plants and/or graphics don’t have fixed costs, but will be charged at cost price. In order to start the production, it is necessary to get written confirmation of the offer and of the graphic draft.

For the printings on coloured base, the final result will be affected by the colour of the background and cannot be totally identical to the graphic proposal; for this reason, we recommend to choose tone-on-tone printings. On the other hand, on white base, the final results will be surely more accurate; nevertheless, the high absorption capacity of the materials together with the usage of water based inks make the colours appear less brilliant than those printed on the paper draft.

PANNONET

PANNONET è un panno antistatico impregnato di uno speciale olio atossico e inodore, che attrae e assorbe anche la polvere più invisibile, lasciando le superfici pulite e luminose. L'olio di cui sono impregnate le garze PANNONET non lascia residui né untuosità e risulta, al contrario, un ottimo idratante per le superfici in legno. Grazie al suo elevato effetto antistatico è ideale per rimuovere polvere e peli di animali da tutte le superfici lisce. Morbido e resistente, sia a secco sia da umido, è disponibile in svariate dimensioni per rispondere alle diverse esigenze di detergenza.

PANNONET is a duster cloth impregnated with a special non-toxic and odorless oil, which attracts and absorbs even the most invisible dust, leaving the surfaces clean and bright. This oil leaves no residue or greasiness and is an excellent moisturizer for wooden surfaces. Thanks to its high antistatic properties it is ideal for removing dust and pet hair from all smooth surfaces. Soft and resistant, both dry and wet, it is available in various sizes to meet the different cleaning requirements.
